## INTRODUCTION

Footbridges are perhaps the constructions where the interaction of the structure with the user is most important. Whether they are built in cities or to bridge an obstacle in the countryside, footbridges are visible from many different angles. The user can also physically touch the work and feel a more or less pleasurable experience when inside or observing it from the outside.

The design of the work implies the harmonious conjunction of structure, form and landscape is fundamental to that experience. The technical part of the design involves ensuring the short- and long-term resistance of the structure as well as the user's comfort in the face of possible vibrations, a common problem in this type of construction. But this comfort does not only depend on mechanical or structural issues. An excessively narrow footbridge over a canyon can provoke rejection when the pedestrian tries to cross safely and quickly, and yet this sensation of emptiness can be intentional when the crossing of the footbridge is done simply for adventure. As the reader can understand, each work is original, and the experience sought by the user is also unique.

Madrid Footbridge Conference 2022 is the continuation of a long set of Conferences that started in Paris in 2002, followed by cities as Porto, Venice, Wroclaw, London and Berlin.

The present edition tries to follow the aim of the Berlin's 2017 conference. In that case the motto of the congress was 'tell us a story'; now we want to know more about the feeling and experience of users, owners, designers and constructors.

In Madrid we would like to create an atmosphere where all of us can share our positives

and negatives **experiences** in competitions, during designing or in construction. We would like also to open the conference to public and the Administration to discuss and confront the way of perceiving footbridges and their **experiences** as users or owners.

For that we prepared the following themes:

- Footbridge competitions: experiences.
- Footbridges as an important part of a system: the context as an experience.
- Bringing life to existing bridges: Experience on bridge transformations into footbridges or cyclist paths.
- Extreme experiences: long span suspension bridges in remote places.
- User experience on the bridge: staying, marketing, feeling vibrations, etc.
- Learning from experience: how overcoming to failure in procurement, designing, etc.
- Experiences of the future: experimentations.
- Sharing your experience: bringing footbridges for human survival. Footbridges in underdeveloped areas.

As usual in these conferences, the points of view are manifold. Engineers, architects, town planners and landscape architects present their views on these experiences. In addition, the international character of the conference will allow to confront the different visions which will undoubtedly enrich all the participants.

## JÜRГ CONZETT

Jürg Konzett, citizen of Schiers (Switzerland), born in 1956 studied civil engineering at EPF Lausanne and ETH Zürich. After receiving his diploma in 1980 he worked for several years in the office of architect Peter Zumthor. In 1988, he started his own office as a structural engineer. Today, the firm Konzett Bronzini Partner in Chur (Grisons) investigates existing constructions and designs new bridges and buildings, often in collaboration with architects.

## MARTIN KNIGHT

Martin is one of the leading UK architects specialising in the design of bridges and transport corridor infrastructure and is a Fellow of the RIBA and the Institution of Civil Engineers and an Honorary Fellow of IStructE. He champions high-quality infrastructure design that creates social value and addresses the Climate and Biodiversity Emergency.

He founded international bridge designers Knight Architects in 2006 and his award-winning practice has completed more than fifty bridges in the UK and internationally. Their approach to design has been hailed as exemplary by bodies including the UK National Infrastructure Commission and the Design Council in the UK and Baukultur Bundestiftung in Germany.

## JESPER HENRIKSEN

For 20 years, Architect and Partner at Dissing+Weitling, he has focused on bridge design and mobility.

Jesper's international experience is grounded in a commitment to creating beautiful infrastructure – iconic landmarks that define cities, fulfil the needs of their people, and take the natural environment into consideration.

He manages many of the Dissing+Weitling's high-profile mobility project. He was part of the team creating the iconic award winner The Bicycle Snake in Copenhagen, the landmark for public transport in Greater Copenhagen Køge Nord Station and the winner of the Liveable Cities category in Danish Design Award 2019: Xiamen Bicycle Skyway in China. This year, Jesper was awarded Danish Bridge and Tunnel Award by IABSE Danmark and Dansk Brodag for stimulating and developing the professional environment within bridge and tunnel construction in Denmark.

## ANDREAS KEIL

Keil, Andreas, Dipl. Ing.; 1979-1985 Study of Civil Engineering at the University of Stuttgart, Germany; since 1985 engineer at schlaich bergmann partner; since 1994 partner; various awards, including Ingenieurpreis des Deutschen Stahlbaues 2019, 2018; Deutscher Brückenbaupreis 2018, 2014; Hugo-Häring-Preis 2003.

## LAURENT NEY

CEO of Ney & Partners – (Leading Architect & Structural Engineer)

Laurent Ney (°1964, Thionville) is a structural engineer and architect trained in Belgium and Germany. Since 1995 he has been a lecturer on structural engineering in several Belgian Universities. In 1996 he founded the engineering firm Ney & Partners in Brussels and Luxembourg. Since 2012 satellites offices were opened in Tokyo, Hanoi, Bordeaux and Delft. Ney's approach is characterized by research based design: optimization and form finding. Laurent Ney combines a practical and theoretical knowledge. He published several books on his design approach. He is a regular key note speaker at international engineering conferences as IABSE, IASS, Footbridge. Many bridge designs of Ney & Partners were awarded in Belgium and abroad because of their innovations.

## IGNACIO PAYÁ

Professor at the Universitat Politècnica de València (UPV) in Spain, where he teaches several courses related to conceptual design, philosophy of structures, construction history and building design.

As a visiting professor, Ignacio has taught and conducted research with Prof. M. Schlaich at TU Berlin (nine months) and with Prof. M. Garlock at Princeton University (25 months). At Princeton, he was a Visiting Professor for Distinguished Teaching and developed the course "The Art of Spanish Bridge Design". Ignacio has received several awards such as the UPV Outstanding PhD Award and the UPV Excellence in Teaching Award (2009). He was also named best civil engineering student (UPV class of 1996). Ignacio is also a founding partner of the spin-off company Calsens devoted to the monitoring of structures and processes, and created in 2010 the Facebook group "El Club de los Locos del Arte Estructural" ("Crazy for Structural Art Club").

## FERNANDO PORRAS

Architect and Master's Degree in Architecture. He has been director of the magazines "Arquitectura" of the Colegio Oficial de Arquitectos de Madrid (1991-1993) and "BAU" of the Colegios de Cantabria, Castilla León and Castilla la Mancha (1994-2002). He is a lecturer in Architectural Projects at the Toledo School of Architecture, University of Castilla la Mancha.

He has received several national and international awards for his built work such as the FAD for Architecture (2012), the FAD for City and Landscape (2012), the Veronica Rudge Green of Harvard University (2015), the CICA award of the Buenos Aires Biennial (2011), the Green Good Design award of the Chicago Athenaeum, the FIDIC award (2014), the Albert Serratos award (2019).

He is co-author of the Madrid Río Project, the remodelling of the Plaza de España (Madrid), the development of the area around the Santiago Bernabéu stadium (Madrid), the Museo de los Poblados de Colonization of Valdecalzada (Badajoz) or the 7 green belt Bridges landscape in Lingang City (Shanghai).

# TECHNICAL SESSION PROGRAMME

WEDNESDAY 07/09/2022 11:00 - 13:30

## ROOM A

Context as experience. Session chair: Cezary Berdnasky

1	Javier Oliva and Arturo Ruiz de Villa	PEDESTRIAN/BIKE BRIDGE OVER MANZANARES RIVER IN MADRID
2	Dan Fitzwilliam	ATWATER VILLAGE CABLE STAYED EQUESTRIAN BRIDGE
3	Andreas Keil, Sebastian Linden, Christiane Sander and Julia Schuler	PIUS-STEG IN INGOLSTADT. AN EXAMPLE FOR HOLISTIC DESIGN
4	Christiane Sander, Tilo Behrmann and Sven Plieninger	A FAMILY OF BRIDGES IN RIEDLINGEN
5	James Marks	OPENING THE CAGE - FOOTBRIDGE OVER THE MYSTIC RIVER
6	Michel Schreinemachers and Wiebe Stric	FORM FOLLOWS EXPERIENCE: NOTES ON THE FUNCTIONALITY OF FOOTBRIDGES
7	John McNeil, Armin Voelske and Rowland Burke	WESTGATE TUNNEL, MELBOURNE - FAMILY OF FOOTBRIDGES FOR A TUNNEL PROJECT
8	Schaun Valdovinos, Chelene Wong, Don Helling and Ken Wilson	CONNECTING A REGION: FOOTHILLS TRAIL WHITE RIVER BRIDGE
9	Ueli Brauen	PRESTRESSED ULTRA-HIGH-PERFORMANCE FIBRE-REINFORCED CONCRETE FOOTBRIDGE
10	Ueli Brauen	WOODEN FOOTBRIDGE IN A NATIONAL HERITAGE SITE
11	Jorge Cascales Fernandez, Ricardo Rico Rubio, Sergio Couto Wörner and Pablo Grandío Noche	MARINEDA FOOTBRIDGE IN A CORUÑA (SPAIN)

## ROOM B

Competitions. Session chair: Jürg Konzett

1	Marcos Sanchez, Robert Ryan and Simon Roberts	MARY ELMES, DESIGN AND CONSTRUCTION OF AN URBAN PEDESTRIAN BRIDGE OVER RIVER LEE IN CORK CITY CENTRE. FROM COMPETITION TO OPENING
2	Rok Mlakar and Viktor Markelj	THE OŁOWIANKA BASCULE FOOTBRIDGE IN GDANSK - A BRIDGE THAT MAKES THE DIFFERENCE
3	Boaz Yariv, Anthony Dewar and Des Mairs	NEW DESIGNS OF RAILWAY STATION FOOTBRIDGES
4	Steve Line and Eric Birkhauser	APPLYING AGILE DESIGN METHODOLOGIES FOR DESIGN COMPETITIONS; EXPERIENCE ON THE INWMG FOOTBRIDGE COMPETITION
5	María Del Mar Goberna and Gonzalo Goberna	CONTEST FOR A BRIDGE FOR PEDESTRIANS AND BYCICLES ACROSS THE MINHO RIVER
6	Jan Biliszczuk, Marco Teichgraeber, and Robert Toczkiwicz	DESIGN COMPETITIONS OF FOOTBRIDGES
7	Yves Pages, Quentin Berton, Klaas de Rycke, Niccolo Baldassini, Narjis Lemrini, Ana Marti Baron and Xavier Veilhan	NYON FOOTBRIDGES COMPETITION, A TWIN EXPERIENCE
8	Isaak Rokach, Devan Levin and Nir Chen	YEHUDIT BRIDGE
9	Etienne Bouleau, Laurent Savioz and Etienne Bouleau	A FULL WEATHERING STEEL FOOTBRIDGE WITH OPTIMIZED LATTICE TRUSS PARAPETS
10	Vincent Servais and Christophe Peigneux	SMALL FOOTBRIDGES : 2 CONTEXTS, 2 RESPONSES
11	Bart Bols and Laurent Ney	PARTICIPATION IN DESIGN COMPETITIONS

**WEDNESDAY 07/09/2022 14:30 - 16:00****ROOM A****Context as experience. Session chair: Nicolas Sterling**

1	Dan Fitzwilliam	WALK THROUGH THE EYE OF A NEEDLE
2	Ana Sanchez and Laurent Ney	FOOTBRIDGES EMBRACED BY THEIR USERS
3	Oliver Stross, Ian Firth, Martin Knight and Bartłomiej Halaczek	AN UNUSUAL 3-WAY FOOTBRIDGE - CONCEPT AND DELIVERY
4	Jan Biliszczuk, Jerzy Onysyk, Robert Tockiewicz and Paweł Wątroba	DESIGN OF THE THREE NATIONS FOOTBRIDGE OVER THE NYSA ŁUŻYCKA RIVER
5	Enrique Goberna, Knut Stockhusen, Daniel Gebreiter and Matteo Dini	FOOTBRIDGES IN MEYDAN ONE MALL IN DUBAI, UAE
6	Edwin Thie	FOOTBRIDGE - CIRKELBRUG. A PLAYFUL WEATHERING STEEL FOOTBRIDGE.
7	Birger Opgård, Gaute Mo, Fernando Ibáñez Climent and Altea Cámara Aguilera	STOVNER TOWER ACCESSIBLE PEDESTRIAN WALKWAY TO THE FIORD VIEWPOINT

**ROOM B****Experimentation. Session chair: Peter Tanner**

1	David Knight, Stuart Chambers and Mike Tonkin	THE DINOSAUR BRIDGE – INNOVATION IN STRUCTURAL FORM & FABRICATION
2	Peter Nugent	NEW WORKFLOWS FOR THE EFFICIENT DESIGN AND CONSTRUCTION OF ARCHITECTURAL FOOTBRIDGES
3	Maria Del Mar Corral and Leonardo Todisco	CAN FOOTBRIDGES BE SMART STRUCTURES?
4	Carlos Lázaro, Carmen Castro-Bugallo, Juan Navarro-Gregori and Pedro Serna	EXPLORING CONCEPTS FOR UHPFRC BENDING-ACTIVE FOOTBRIDGES
5	Mario Guisasola	STANDARDIZATION OF THREE EFFICIENT FOOTBRIDGES: VON MISES, MONOCONTENTIO AND BICONTENTIO PROTOTYPES
6	Juan Sobrino	“SUSTAINABILITY AND VISUAL CONSIDERATIONS FOR FOOTBRIDGES DESIGNED WITH STAINLESS STEEL
7	Martin Knight	FLOW BRIDGE – A USER ORIENTED FRP MODULAR FOOTBRIDGE
8	Julie Devènes, Jan Brütting, Maléna Bastien-Masse, , Célia Küpfer and Corentin Fivet	RE:CRETE - A FOOTBRIDGE MADE OF REUSED REINFORCED CONCRETE BLOCKS

**WEDNESDAY 07/09/2022 16:30 - 18:30****ROOM A****Context as experience. Session chair: Nicolas Sterling**

1	Bart Bols Matthieu Mallié and Laurent Ney	TINTAGEL FOOTBRIDGE - VOID FOR IMAGINATION
2	John Anderson and Maja Wilson	THE MANY INPUTS TO CREATING A SINGLE MOVING FORM, THE V&A FOOTBRIDGE
3	Helena Russell and Jonathan Faragher	THE MOTORWAY FOOTBRIDGE AS HERITAGE; A TECHNICAL AND ARTISTIC CELEBRATION OF THOUGHTFUL DESIGN
4	Gaute Mo, Mario Rando, Kathleen Overton, Fernando Ibáñez Climent and Altea Cámara Aguilera	BOOMERANG AND JUNGLE BRIDGES : CONNECTING CITY AND FOREST
